Opbevaringsløsning til garagen

INTRODUKTION

For at du kan få mest mulig glæde af dit nye produkt, beder vi dig gennemlæse denne brugsanvisning, før du tager produktet i brug. Vi anbefaler dig desuden at gemme brugsanvisningen, hvis du senere skulle få brug for at genopfriske din viden om produktets funktioner.

TEKNISKE SPECIFIKATIONER

Skab med 2 døre og 3 hylder.
66 x 45,7 x 198,1 cm. (BxDxH).

2 overskabe med 2 døre.
66 x 30,5 x 40,6 cm. (BxDxH)

2 værktøjstavler med huller til kroge
66 x 68,4 x 2 cm. (BxDxH).

Bordplade af massivt træ
132 x 45,7 x 2,5 cm. (BxDxH).

Modul med 4 skuffer
66 x 45,7 x 86,4 cm. (BxDxH).

Skab med 2 døre og hylde.
66 x 45,7 x 86,4 cm. (BxDxH).

SÆRLIGE SIKKERHEDSVEJLEDNINGER

Opbevaringsløsningen til garagen skal stå oprejst og være fastgjort til en bagvæg. Den må ikke stå frit!

Det anbefales at være 2 personer til at flytte, samle og montere skabsinventaret. I modsat fald kan det medføre rygskada eller andre personskader.

DELE AF OPBEVARINGSLØSNING TIL GARAGEN

1. Skab med 2 døre og 3 hylder
2. 2 overskabe
3. 2 værktøjstavler
4. Bordplade
5. Modul med 4 skuffer
6. Skab med 2 døre og hylde

Samling

Højt opbevaringsskab BOKS 1

DK

Venstre sidepanel 1 stk.

Bagpanel 2 stk.

Højre sidepanel 1 stk.

Venstre dør 1 stk.

Højre dør 1 stk.

Toppanel 1 stk.

Bundpanel 1 stk.

Hylde 3 stk.

TRIN 1

Læg de to bagpaneler fladt ned, og forbind dem med M5*10-skruer og møtrikker. Kontroller, at det øverste og nederste endehul er i samme position.

TRIN 2

Placer det venstre panel som vist, og forbind det med bagpanelet med M5*10-skruer. Vær opmærksom på placeringen af de øvre og nedre endehuller.

TRIN 3

Monter det højre sidepanel i henhold til det andet trin. Vær opmærksom på placeringen af de øvre og nedre endehuller. De to sideplader er symmetriske.

TRIN 4

For at montere top- og bundpanelerne skal sidepanelerne sættes ind mellem de trekantede linjer på indersiden af top- og bundpanelerne og siderne. Den ene ende af de fire runde huller i sidepladen er den øverste ende.

TRIN 5

Skru top- og bundpanelerne fast til sidebaggpanelerne.

TRIN 6

Monter spændeskive til dørhængsel på de fire hjørner af top- og bundpladerne.

TRIN 7

For at montere venstre dør skal du justere dørhængselshullet i bunden af venstre dør ind efter midten af spændeskiverne til dørhængsel på venstre side af bundpladen, indsætte dørhængselet og derefter fastgøre dørhængselet til spændeskiverne til dørhængsel. Monter dørhængselet og den højre dør på samme måde.

TRIN 8

Skru den justerbare nivelleringsanordning med gevind ind i bunden af stålnivelleringsbenet, og brug 4 M6*16-skruer til at fastgøre stålbenet til bunden af bundpanelet, så ydersiden er på linje med bundpanelet. Monter de tre andre fødder på samme måde.

TRIN 9

Gummiet er monteret bag på bundpanelet.

Dørstopper Antal: 1 stk.

Håndtag Antal: 1 stk.

Gummiring Antal: 1 stk.

Monter håndtag

TRIN 10

Stil skabet oprejst, monter en af hylderne i midten af skabet (til låsning af døren), og de to andre hylder skal monteres, hvor det er praktisk muligt.

Over skabe BOKS 2 og 3

Sidepanel 2 stk.

Bagpanel 2 stk.

Venstre dør 1 stk.

Højre dør 1 stk.

Toppanel 1 stk.

Bundpanel 1 stk.

Monter overskabene ligesom det høje skab. Det øverste skab har ingen hylder eller gummiringe, så disse to ting skal du ignorere.

Skab BOKS 4

DK

Venstre sidepanel 1 stk.

Bagpanel 2 stk.

Højre sidepanel 1 stk.

Venstre dør 1 stk.

Højre dør 1 stk.

Toppanel 1 stk.

Monter underskabet i henhold til monteringsvejledningen til det høje skab.

I trin 2 og trin 3 forbindes sidepanelet og bagpanelet med bolte og møtrikker.

Bundpanel 1 stk.

Møtrik M5
Antal: 9 stk.

Skrue M5*10
Antal: 9 stk.

Trin10 Hylden kan justeres efter ønske.

Hylde 1 stk.

Tilslutningshuller

Høje skab set fra højre

Skab set fra siden

Skab set bagfra

Bordpladens tilslutningshuller

Skab set ovenfra

Værktøjstavle

Vægskabets tilslutningshul

Monteres på væggen

DK

TRIN 1

Rawplugg
Antal: 16 stk.

Planlæg placeringen af værktøjsskabet, bestem placeringen af forbindelseshullet mellem værktøjstavlen og overskabet, og fastgør derefter rawpluggen. Fødderne på det høje skab og underskabet kan hæves, og rawpluggens placering kan være lidt højere.

TRIN 2

Skrue M8*18
Antal: 8 stk.

Flangemøtrik M8
Antal: 4 stk.

Anbring det høje skab og overskabet på deres respektive positioner, juster dem og tilslut dem parvis. Der er monteret nittermøtrikker på sidepanelerne af skuffeskabet, så der er ikke behov for at bruge møtrikkerne ved sammenkobling med de andre skabe.

TRIN 3

Selvskærende skrue
M5*15
Antal: 8 stk.

Monter bordpladen. Skru de selvskærende skruer ind i bordpladen gennem monteringshullerne på toppen af skabet, og sørg for, at bordpladen er på linje med ydersiden af underskabet.

Fjern flere skuffer, hvis det er nødvendigt, og sæt skufferne på plads igen.

TRIN 4

Træskrue M6*60
Antal: 8 stk.

Metalspændeskive Ø22,8
Antal: 8 stk.

Monter værktøjstavlen. De store selvskærende skruer skal gå gennem de runde huller i de fire hjørner af værktøjstavlen og skrues ind i vægsticket på væggen for at fastgøre værktøjstavlen til væggen.

TRIN 5

Træskrue M6*60
Antal: 8 stk.

Metalspændeskive Ø22,8
Antal: 8 stk.

For at installere skabet skal du skrue den store selvskærende skrue gennem hullet på vægskabets bagpanel ind i vægsticket for at fastgøre skabet.

TRIN 6

Skrue M8*18
Antal: 8 stk.

Flangemøtrik M8
Antal: 8 stk.

Der anvendes bolte og møtrikker mellem overskabe og det høje skab.

Montering

Høyt oppbevaringsskap, BOX1

NO

Venstre sidepanel, 1 stk.

Bakplater, 2 stk.

Høyre sidepanel, 1 stk.

Venstre dør, 1 stk.

Høyre dør, 1 stk.

Toppanel, 1 stk.

Bunnpanel, 1 stk.

Hylle, 3 stk.

TRINN 1

Legg de to bakplatene flatt og monter de sammen med skruer og muttere av typen M5*10. Vær oppmerksom på at de øvre og nedre hullene endehullene er i samme posisjon.

TRINN 2

Plasser det venstre sidepanelet som vist, og koble det til bakplaten med skruer av typen M5*10. Vær oppmerksom på plasseringen av de øvre og nedre hullene.

TRINN 3

Monter høyre sidepanel i henhold til trinn 2. Vær oppmerksom på plasseringen av de øvre og nedre hullene, da de to sideplatene er symmetriske.

TRINN 4

For å installere topp- og bunnpanelene, bør sidepanelene settes inn mellom de trekantede linjene på innsiden av topp- og bunnpanelene og sidene. Den ene enden av de fire runde hullene i sideplaten er den øvre kanten.

TRINN 5

Skru topp- og bunnpanelene til sidepanelene.

TRINN 7

For å installere venstre dør, juster hullet til dørhengselet nederst på venstre dør med midten av skiven til dørhengsel på venstre side av bunnplaten, sett inn dørhengselet, og fest deretter dørhengselet på skiven til dørhengsel. Monter dørhengselet og høyre dør på samme måte.

TRINN 6

Monter skivene til dørhengselene i de fire hjørnene til topp- og bunnplatene.

TRINN 8

Skru det justerbare beinet inn i stålfeste og bruk 4 stk. M6*16-skruer til å feste det stålfeste til bunnplaten, slik at utsiden er på linje med bunnpanelet. Monter de andre tre føttene på samme måte.

TRINN 9

Monter gummiring

Gummien skal monteres på baksiden av bunnpanelet.

Monter håndtak

Dørstopper
Ant.: 1 stk.

Håndtak
Ant.: 1 stk.

Gummiring
Ant.: 1 stk.

TRINN 10

Reis opp skapet, monter en av hyllene midt i skapet (for å låse døren) og de to andre hyllene skal installeres der det er praktisk.

Overskap BOX 2 og 3

Sidepanel, 2 stk.

Bakplater, 2 stk.

Venstre dør, 1 stk.

Høyre dør, 1 stk.

Toppanel,
1 stk.

Bunnpanel,
1 stk.

Installer overskapene på samme måte som høyskapet. Overskapene har ingen hyller og gummiringer, vennligst ignorer disse to elementene.

Skap BOX 4

NO

Venstre sidepanel, 1 stk.

Bakplate, 2 stk.

Høyre sidepanel, 1 stk.

Venstre dør, 1 stk.

Høyre dør, 1 stk.

Toppanel, 1 stk.

Monter bunneskapet i henhold til instruksjonene for montering av høyskapet.

I trinn 2 og trinn 3 er sidepanelet og bakplate-
ne kobles sammen med bolter og muttere.

Mutter M5
Ant.: 9 stk.

Skrue M5*10
Ant.: 9 stk.

Bunnpanel, 1 stk.

Trinn 10 Hyllen kan justeres etter ønske.

Veggmontering

NO

TRINN 1

Veggplugg
Ant.: 16 stk.

Planlegg plasseringen av verktøyskapet, bestem posisjonen til koblingshullet mellom verktøyplaten og overskapene, og fest deretter veggpluggen. Føttene til høyskapet og underskapet kan heves, og posisjonen til veggpluggen kan være litt høyere.

TRINN 2

Skrue M8*18
Ant.: 8 stk.

Flensmutter M8
Ant.: 4 stk.

Plasser høyskapet og overskapene på respektiv posisjon, og koble de sammen to og to. Det er montert nagler på sidepanelene til skuffeseksjonen, og det er ikke nødvendig med mutrer når du skal koble til de andre skapene.

TRINN 3

Selvgjengende
skrue
M5*15
Ant.: 8 stk.

Monter benkeplaten. Skru de selvgjengende skruene inn i benken gjennom monteringshullene på toppen av underskapet, og pass på at benkeplaten er på linje med utsiden av underskapet.

Ta ut alle nødvendige skuffer, og sett de tilbake igjen når alt er montert.

TRINN 4

Treskrue M6*60
Ant.: 8 stk.

Metallskive Ø22,8
Ant.: 8 stk.

Monter verktøyplaten. De store selvgjengende skruene må passere gjennom de runde hullene i de fire hjørnene på verktøyplaten og skru dem inn i veggpluggen på veggen for å feste verktøyplaten til veggen.

TRINN 5

Treskrue M6*60
Ant.: 8 stk.

Metallskive Ø22,8
Ant.: 8 stk.

For å montere skapet må du skru inn den store selvgjengende skruen inn gjennom hullet på bakplaten til overskapet for å feste det til veggen.

TRINN 6

Skrue M8*18
Ant.: 8 stk.

Flensmutter M8
Ant.: 8 stk.

Bolter og muttere brukes mellom overskapene og høyskapet.

SE

Övre panel 1 st

Bottenpanel 1 st

Hylla 3 st

STEG 1

Lägg de två bakpanelerna plant och anslut dem med M5 x 10-skruvor och muttrar. Tänk på att de övre och nedre hålen ska vara i samma position.

STEG 2

Placera den vänstra panelen enligt bilden och anslut den till den bakre panelen med M5 x 10-skruvor. Var uppmärksam på placeringen av de övre och nedre hålen.

STEG 3

Montera höger sidopanel enligt det andra steget. Var uppmärksam på placeringen av de övre och nedre hålen, de två sidoplattorna är symmetriska.

STEG 4

För att montera den övre panelen och bottenpanelen, ska sidopanelerna föras in mellan de triangulära linjerna på insidan av den övre panelen och bottenpanelen och på sidorna. Sidan med de fyra runda hålen på sidoplattan är den övre änden.

STEG 5

Skruva fast den övre panelen och bottenpanelen på sidobakpanelerna.

STEG 7

För att montera vänster dörr, rikta in dörrgångjärnshålet vid botten av vänster dörr mot mitten av dörrgångjärnsbrickan på vänster sida av bottenpanelen. För in dörrgångjärnet och fäst sedan dörrgångjärnet på dörrgångjärnsbrickan. Montera dörrgångjärnet och höger dörr på samma sätt.

STEG 6

Montera dörrgångjärnsbrickan på de fyra hörnen av den övre panelen och bottenpanelen.

STEG 8

Skruva in den gängade justerbara utjämnaren i botten av den höjdjusterbara foten i stål och använd 4 M6 x 16-skrivar för att fästa den höjdjusterbara foten i stål på bottenpanelen, så att den yttre sidan är i linje med bottenpanelen. Montera de andra tre fötterna på samma sätt.

STEG 9

Montera dörrstopp

Montera gummiring

Gumringen monteras på baksidan av bottenpanelen.

Montera handtag

Dörrstopp.
Antal: 1 st

Handtag.
Antal: 1 st

Anslutningshål för bänkskiva

Skåpet sett ovanifrån

Verktyspanel

Anslutningshål för väggskåp

Montera på väggen

STEG 1

Väggplugg
Antal: 16 st

SE

Planera placeringen av verktygsskåpet, bestäm positionen för anslutningshålet mellan verktygspanelen och det övre skåpet, fäst sedan väggpluggen. Du kan höja fötterna på det höga skåpet och underskåpet och placera väggpluggen något högre.

STEG 2

Skruv M8 x 18.
Antal: 8 st

Flänsmutter M8.
Antal: 4 st

Placera de höga skåpen och de övre skåpen i sina respektive positioner, rikta in dem och anslut dem parvis. Nitmuttrar har installerats på sidopanelerna på lådskåpet, det finns inget behov av att använda muttrarna vid anslutning av andra skåp.

STEG 3

Självgående skruv
M5 x 15.
Antal: 8 st

Montera bänkskivan. Skruva in de självgående skruvarna i bänkskivan genom monteringshålen på skåpets ovsida och se till att bänkskivan är i linje med underskåpets utsida.

Ta bort fler lådor vid behov och sätt slutligen tillbaka lådorna på plats.

STEG 4

Montera verktygspanelen. De stora självgängande skruvarna måste passera genom de runda hålen i verktygspanelens fyra hörn och skruvas in i väggpluggen för att fästa verktygspanelen i väggen.

Träskruv M6 x 60.
Antal: 8 st

Metallbricka $\text{\O} 22,8$.
Antal: 8 st

STEG 5

För att installera skåpet, skruva in den stora självgängande skruven genom hålet på skåpets baksida i väggpluggen för att fästa skåpet.

Träskruv M6 x 60.
Antal: 8 st

Metallbricka $\text{\O} 22,8$.
Antal: 8 st

STEG 6

Bultar och muttrar används mellan de övre skåpen och det höga skåpet.

Skruv M8 x 18.
Antal: 8 st

Flänsmutter M8.
Antal: 8 st

Autotallin kalusteryhmä

JOHDANTO

Saat uudesta tuotteestasi suurimman hyödyn, kun luet tämän käyttöohjeen läpi ennen tuotteen käyttöönottoa. Säilytä tämä käyttöohje, jotta voit tarvittaessa palauttaa mieleesi tuotteen toiminnot.

TEKNISET TIEDOT

Kaappi, jossa on 2 ovea ja 3 hyllyä.
66 x 45,7 x 198,1 cm. (LxSxK)

2 yläkaappia, joissa kummassakin 2 ovea.
66 x 30,5 x 40,6 cm. (LxSxK)

2 reikälevyä, joissa reiät koukuille
66 x 68,4 x 2 cm. (LxSxK)

Massiivipuinen pöytälevy
132 x 45,7 x 2,5 cm. (LxSxK)

Moduuli, jossa 4 vetolaatikkoa
66 x 45,7 x 86,4 cm. (LxSxK)

Kaappi, jossa 2 ovea ja hylly.
66 x 45,7 x 86,4 cm. (LxSxK)

TURVALLISUUSOHJEET

Autotallin kalusteryhmän tulee olla pystysuorassa ja se tulee kiinnittää takaseinään. Sitä ei saa jättää kiinnittämättä!

Suosittellemme, että kaapin siirtämiseen, kokoamiseen ja asentamiseen osallistuu kaksi henkilöä. Jos näin ei toimita, seurauksena voi olla selkä- tai muita vammoja.

Vasen ovi 1 KPL

Oikea ovi 1 KPL

FI

Yläpaneeli 1 KPL

Alapaneeli 1 KPL

Hylly 3 KPL

1. VAIHE

Aseta kaksi takapaneelia tasaiselle alustalle ja yhdistä ne M5*10-ruuveilla ja muttereilla. Varmista, että ylä- ja alaosan reiät ovat samassa kohdassa.

2. VAIHE

Aseta vasen paneeli kuvan mukaisesti ja kiinnitä se takapaneeliin M5*10-ruuveilla. Kiinnitä huomiota ylä- ja alaosan reikiin sijaintiin.

3. VAIHE

Asenna oikea sivupaneeli toisen vaiheen mukaisesti. Kiinnitä huomiota ylä- ja alaosan reikiin sijaintiin. Sivulevyt ovat symmetrisiä.

4. VAIHE

Ylä- ja alapaneelien asentamista varten sivupaneelit on työnnettävä ylä- ja alapaneelien ja sivujen sisäpuolella olevien kolmiomaisten viivojen väliin. Sivulevyn neljän pyöreän reiän toinen pää on yläpää.

5. VAIHE

Ruuvi M8*10
MÄÄRÄ: 16 KPL

Laippamutteri M8
MÄÄRÄ: 16 KPL

Kuusiokoloavain

Kiinnitä ylä- ja alapaneelit ruuveilla sivutakapaneeliin.

6. VAIHE

Ovisaranan aluslevy MÄÄRÄ: 4 KPL

Asenna ovisaranan aluslevy ylä- ja alalevyn neljään kulmaan.

7. VAIHE

Ovisarana
MÄÄRÄ: 4 KPL

Asenna vasen ovi kohdistamalla vasemman oven alareunassa oleva ovisaranan reikä pohjalevyn vasemmalla puolella olevan ovisaranan aluslevyn keskikohtaan, aseta ovisarana paikalleen ja kiinnitä sitten ovisarana ovisaranan aluslevyyn. Asenna ovisarana ja oikea ovi samalla tavalla.

8. VAIHE

Teräksinen kaluste-jalka MÄÄRÄ: 4 KPL

Ruuvi M6*16
MÄÄRÄ: 16 KPL

Kierteitetty säätöjalka MÄÄRÄ: 4 KPL

Metallinen aluslevy Ø12,5
MÄÄRÄ: 16 KPL

Ruuvaa kierteitetty säätöjalka teräksisen kalustejalan pohjaan ja kiinnitä teräksinen kalustejalka 4 M6*16-ruuvilla alapaneelin pohjaan siten, että ulompi puoli on samassa linjassa alapaneelin kanssa. Asenna kolme muuta jalkaa samalla tavalla.

9. VAIHE

Kumi asennetaan alapaneelin ta-
kaosaan.

Ovistoppari MÄÄRÄ: 1 KPL
Kahva MÄÄRÄ: 1 KPL
Kumirengas MÄÄRÄ: 1 KPL

10. VAIHE

Nosta kaappi pystyyn, asenna yksi
hyllyistä kaapin keskelle (oven lukit-
semista varten), ja kaksi muuta hyllyä
haluamallesi korkeudelle.

Yläkaapit LAATIKKO 2 & 3

Kiinnitysreiät

Korkea kaappi oikealta katsottuna

Kaappi sivulta katsottuna

Kaappi takaa katsottuna

Pöytätason kiinnitysreiät

Kaappi ylhäältä katsottuna

Reikälevy

Seinäkaapin kiinnitysreikä

Kiinnittäminen seinään

1. VAIHE

Seinätulppa
MÄÄRÄ: 16 KPL

FI

Valitse työkalukaapin paikka, määritä pöytäta-son ja yläkaapin välisen kiinnitysreiän sijainti ja kiinnitä sitten seinätulppa. Korkean kaapin ja alakaapin jalvoja voi korottaa, ja seinätulppa voi olla hieman korkeammalla.

2. VAIHE

Ruuvi M8*18
MÄÄRÄ: 8 KPL

Laippamutteri M8
MÄÄRÄ: 4 KPL

Järjestä korkeat ja yläkaapit omille paikoilleen, kohdista ne ja liitä ne pareittain. Vetolaatikoilla varustetun kaapin sivupaneeleihin on asennettu niittimutterit, joten muttereita ei tarvitse käyttää muiden kaappien liittämiseen.

3. VAIHE

Itsekierteittävä ruuvi
M5*15
MÄÄRÄ: 8 KPL

Asenna pöytälevy. Kierrä itsekierteittävät ruuvit pöytälevvyyn kaapin yläosassa olevien kiinnitysreikien kautta ja varmista, että pöytälevy on samassa linjassa alakäapin ulkopinnan kanssa. Irrota tarvittaessa lisää vetolaatikoita ja asenna lopuksi vetolaatikat takaisin paikoilleen.

4. VAIHE

Puuruuvi M6*60
MÄÄRÄ: 8 KPL

Metallinen aluslevy Ø22,8
MÄÄRÄ: 8 KPL

Asenna reikälevy. Kiinnitä reikälevy seinään kiertämällä suuret itsekierteittävät ruuvit reikälevyn neljässä kulmassa olevien pyöreiden reikien läpi seinässä olevaan seinätulppaan.

5. VAIHE

Puuruuvi M6*60
MÄÄRÄ: 8 KPL

Metallinen aluslevy Ø22,8
MÄÄRÄ: 8 KPL

Kiinnitä kaappi kiertämällä suuri itsekierteittävä ruuvi seinäkaapin takapaneelissa olevan reiän läpi seinätulppaan.

6. VAIHE

Ruuvi M8*18
MÄÄRÄ: 8 KPL

Laippamutteri M8
MÄÄRÄ: 8 KPL

Yläkaappien ja korkean kaapin välissä käytetään pultteja ja muttereita.

Garage Storage

INTRODUCTION

To get the most out of your new product, please read this manual before use. Please also save the manual in case you need to refer to it at a later date.

TECHNICAL DATA

Cabinet with 2 doors and 3 shelves.
66 x 45,7 x 198,1 cm. (WxDxH)

2 upper cabinets with 2 doors each.
66 x 30,5 x 40,6 cm. (WxDxH)

2 tool boards with holes for hooks
66 x 68,4 x 2 cm. (WxD)

Benchtop made from solid wood
132 x 45,7 x 2,5 cm. (WxDxH)

Module with 4 drawers
66 x 45,7 x 86,4 cm. (WxDxH)

Cabinet with 2 doors and shelf.
66 x 45,7 x 86,4 cm. (WxDxH)

SPECIAL SAFETY INSTRUCTIONS

The garage storage must stand upright and be secured to a rear wall. It must not be left to stand freely!

It is recommended that two people move, assemble, and mount the cabinet furniture. Failure to do so can result in back or other injury.

PARTS OF THE GARAGE STORAGE

1. Cabinet with 2 doors and 3 shelves
2. 2 upper cabinets
3. 2 tool boards
4. Benchtop
5. Module with 4 drawers
6. Cabinet with 2 doors and shelf

Assembly

Tall storage cabinet BOX1

Left Side Panel
1 PCS

Back Panel
2 PCS

Right Side Panel
1 PCS

Left Door
1 PCS

Right Door
1 PCS

GB

Top Panel 1 PCS

Bottom Panel 1 PCS

Shelf 3 PCS

STEP 1

Lay the two back panels flat and connect them with M5*10 screws and nuts. Note that the upper and lower end holes are in the same position.

STEP 2

Place the left panel as shown, and connect it with the back panel with M5*10 screws. Pay attention to the position of the upper and lower end holes.

STEP 3

Install the right side panel according to the second step. Pay attention to the position of the upper and lower end holes, the two side plates are symmetrical.

STEP 4

To install the top and bottom panels, the side panels should be inserted between the triangular lines on the inner side of the top and bottom panels and the sides. One end of the four round holes of the side plate is the upper end.

STEP 5

Bolt the top and bottom panels to the side back panels.

STEP 6

Install door hinge washer on the four corners of the top and bottom plates.

STEP 7

To install the left door, align the door hinge hole at the bottom of the left door with the center of the door hinge washer on the left side of the bottom plate, insert the door hinge, and then pin the door hinge to the door hinge washer. Install the door hinge and the right door in the same way.

STEP 8

Screw the threaded adjustable leveler into the bottom of the steel leveling leg, and use 4 M6*16 screws to fix the steel leveling leg to the bottom of the bottom panel, so that the outer side is aligned with the bottom panel. Install the other three feet the same way.

STEP 9

The rubber is installed at the rear of the bottom panel.

Door stopper
QTY:1 PCS

Handle
QTY:1 PCS

Rubber ring
QTY:1 PCS

STEP 10

Upright the cabinet, install one of the shelves in the middle of the cabinet (for locking the door), and the other two shelves should be installed where convenient.

Upper cabinets BOX 2 & 3

Side panel 2 PCS

Back panel 2 PCS

Left door 1 PCS

Right door 1 PCS

Top panel
1 PCS

Bottom panel
1 PCS

Install the upper cabinets just like the tall cabinet. The upper cabinet has no shelves and rubber rings, please ignore these two items.

Cabinet BOX 4

GB

Left side panel
1 PCS

Back panel
2 PCS

Right side panel
1 PCS

Left door
1 PCS

Right door
1 PCS

Top Panel
1 PCS

Please install the base cabinet according to the tall cabinet assembly instructions.

In step2 and Step3 the side panel and back panel are connected with bolts and nuts.

Nut M5
QTY:9 PCS

Screw M5*10
QTY:9 PCS

Bottom Panel
1 PCS

Step10 the shelf can be adjusted at will.

Shelf 1 PCS

Connection Holes

Cabinet connection holes

Top view of cabinet

Tool Board

Mount to the Wall

STEP 1

Wall Plug
QTY:16 PCS

GB

Plan the placement of the tool cabinet, determine the position of the connecting hole between the tool board and the upper cabinet, then fix the wall plug. The feet of the high cabinet and the base cabinet can be raised, and the position of the wall plug can be a little higher.

STEP 2

Screw M8*18
QTY:8 PCS

Flange nut M8
QTY:4 PCS

Arrange the tall and the upper cabinets in their respective positions, align them, and connect them in pairs. Riveting nuts have been installed on the side panels of the drawer cabinet, there is no need to use the nuts when connecting other cabinets.

STEP 3

Self-tapping screw
M5*15
QTY:8 PCS

Install the benchtop. Screw the self-tapping screws into the benchtop through the mounting holes on the top of the cabinet, making sure that the benchtop is aligned with the outside of the base cabinet.

Remove more drawers if necessary, and finally install the drawers back in place.

STEP 4

Wood screw M6*60
QTY:8 PCS

Metal washer Ø22.8
QTY:8 PCS

Install the tool board. The large self-tapping screws must pass through the round holes at the four corners of the tool board and screw into the wall plug on the wall to fix the tool board to the wall.

STEP 5

Wood screw M6*60
QTY:8 PCS

Metal washer Ø22.8
QTY:8 PCS

To install the cabinet, screw in the large self-tapping screw through the hole on the back panel of the wall cabinet into the wall plug to fix the cabinet.

STEP 6

Screw M8*18
QTY:8 PCS

Flange nut M8
QTY:8 PCS

Bolts and nuts are used between upper cabinets and the tall cabinet.

Legen Sie die beiden Rückwände flach nebeneinander und verbinden Sie beide mit M5x10-Schrauben und -Muttern. Achten Sie darauf, dass die Lage der oberen und unteren Endlöcher übereinstimmt.

SCHRITT 2

Platzieren Sie die linke Platte wie dargestellt und verbinden Sie diese mittels M5x10-Schrauben mit der Rückwand. Achten Sie auf die Lage der oberen und unteren Endlöcher.

SCHRITT 3

Montieren Sie die rechte Seitenwand wie in Schritt 2 beschrieben. Achten Sie auf die Lage der oberen und unteren Endlöcher – beide Seitenplatten sind symmetrisch.

SCHRITT 4

Zur Montage von Deck- und Bodenplatte müssen die Seitenwände zwischen den dreieckigen Linien an der Innenseite der Deck- und Bodenplatten und den Seiten eingefügt werden. Das Ende mit den vier runden Löchern in den Seitenplatten ist das obere Ende.

SCHRITT 5

Verschrauben Sie die Deck- und Bodenplatte mit den Seiten- und Rückwänden.

SCHRITT 7

Um die linke Tür einzubauen, richten Sie das Türscharnierloch an der Unterseite der linken Tür auf die Mitte der Türscharnieraufnahme an der linken Seite der Bodenplatte aus, setzen Sie das Türscharnier ein und stecken Sie das Türscharnier in die Türscharnieraufnahme. Montieren Sie die rechte Tür und ihr Türscharnier auf die gleiche Weise.

SCHRITT 6

Montieren Sie die Türscharnieraufnahmen an den vier Ecken der Deck- und der Bodenplatte.

SCHRITT 8

Schrauben Sie die Höheneinstellung mit Gewinde in die Unterseite des einstellbaren Stahlfußes, und befestigen Sie den einstellbaren Stahlfuß mit vier M6x16-Schrauben an der Unterseite der Bodenplatte, sodass die Außenseite mit der Bodenplatte abschließt. Montieren Sie die anderen drei Füße auf die gleiche Weise.

SCHRITT 9

Türanschlag anbringen

Gumming anbringen

Bringen Sie das Gummi an der Rückseite der Bodenplatte an.

Griff anbringen

Türanschlag,
Anzahl: 1 Stück

Griff,

Befestigung an der Wand

SCHRITT 1

Wanddübel,
Menge: 16 Stück

DE

Planen Sie die Platzierung des Werkzeugschranks, bestimmen Sie die Lage des Verbindungslochs zwischen der Werkzeuggestalt und dem Oberschrank und befestigen Sie dann den Wanddübel.

Die Füße des hohen Schrankes und der Unterschränke können höher gestellt werden. Deswegen kann die Lage des Dübels etwas höher sein.

SCHRITT 2

Schraube M8x18
Anzahl: 8 Stück

Flanschmutter M8
Anzahl: 4 Stück

Bringen Sie den hohen Schrank und die Oberschränke in ihre jeweilige Lage, richten Sie die Schränke aus und verbinden Sie sie paarweise aneinander. An den Seitenwänden des Schubladenschranks sind Einnietmuttern angebracht. Sie brauchen die Muttern bei der Verbindung mit den anderen Schränken nicht zu verwenden.

SCHRITT 3

Blechschraube
M5x15
Anzahl: 8 Stück

Montieren Sie die Arbeitsplatte. Schrauben Sie die Blechschrauben durch die Befestigungslöcher an der Oberseite des Schrankes in die Arbeitsplatte und achten Sie darauf, dass die Arbeitsplatte mit der Außenseite des Unterschränks abschließt. Nehmen Sie nötigenfalls Schubladen heraus, und schieben Sie die Schubladen schließlich wieder zurück.

SCHRITT 4

Holzschraube M6x60
Anzahl: 8 Stück

Metallunterlegscheibe
Ø22,8
Anzahl: 8 Stück

Montieren Sie die Werkzeugtafel. Die großen Blechschrauben müssen durch die runden Löcher an den vier Ecken der Werkzeugtafel geführt und in den Dübel an der Wand geschraubt werden, um die Werkzeugtafel an der Wand zu befestigen.

SCHRITT 5

Holzschraube M6x60
Anzahl: 8 Stück

Metallunterlegscheibe
Ø22,8
Anzahl: 8 Stück

Zur Befestigung des Schrankes schrauben Sie die große Blechschraube durch das Loch an der Rückwand des Oberschranks in den Dübel.

SCHRITT 6

Schraube M8x18
Anzahl: 8 Stück

Flanschmutter M8
Anzahl: 8 Stück

Verwenden Sie Schrauben und Muttern zwischen den Oberschränken und dem hohen Schrank.

Montaż

Szafa wysoka PUDEŁKO 1

Lewy panel boczny 1 szt.

Panel tylny 2 szt.

Prawy panel boczny 1 szt.

Drzwi lewe 1 szt.

Drzwi prawe 1 szt.

PL

Panel górny 1 szt.

Panel dolny 1 szt.

Półka 3 szt.

KROK 1

Ułożyć płasko dwa panele tylne i połączyć je za pomocą śrub M5*10 oraz nakrętek. Zwrócić uwagę, aby górne i dolne otwory końcowe znajdowały się w tej samej pozycji.

KROK 2

Umieścić lewy panel jak na rysunku i połączyć go z tylnym panelem za pomocą śrub M5*10. Zwrócić uwagę na położenie górnych i dolnych otworów końcowych.

KROK 3

Zainstalować prawy panel boczny zgodnie z drugim krokiem. Zwrócić uwagę na położenie górnych i dolnych otworów końcowych, dwie płyty boczne są symetryczne.

KROK 4

Aby zamontować panele górne i dolne, należy włożyć panele boczne pomiędzy trójkątne linie na wewnętrznej stronie paneli górnych i dolnych oraz na bokach. Jeden koniec z czterech okrągłych otworów płyty bocznej jest górnym końcem.

KROK 5

Przykręcić panel górny i dolny do boków paneli tylnych.

KROK 7

Aby zainstalować lewe drzwi, wyrównać otwór zawiasu na dole lewych drzwi ze środkiem podkładki zawiasu po lewej stronie panelu dolnego, włożyć zawias drzwiowy, a następnie przypiąć go. W ten sam sposób zamontować zawias drzwiowy oraz prawe drzwi.

KROK 6

Zainstalować podkładkę pod zawias drzwiowy na czterech rogach płyty górnej i dolnej.

KROK 8

Przykręcić gwintowaną stopkę do dolnej części stalowej nogi poziomującej, następnie za pomocą 4 śrub M6*16 przymocować stalową nogę poziomującą do dolnej części panelu, tak aby zewnętrzna strona była wyrównana z panelem dolnym. W ten sam sposób zainstalować pozostałe trzy nogi.

KROK 9

Zamontować blokadę drzwi

Zamontować pierścień gumowy

Gumę montuje się w tylnej części dolnego panelu.

Zamontować uchwyt

Blokada drzwi
Ilość: 1 szt.

Uchwyt
Ilość: 1 szt.

Pierścień gumowy
Ilość: 1 szt.

KROK 10

Postawić szafę, jedną z półek zamontować na środku (do blokowania drzwi), a pozostałe dwie półki zamontować tam, gdzie jest to wygodne.

Szafka górna PUDEŁKO 2 i 3

Panel boczny
2 szt.

Panel tylny 2 szt.

Drzwi lewe
1 szt.

Drzwi prawe
1 szt.

Panel górny
1 szt.

Panel dolny
1 szt.

Zmontować szafka górne tak samo jak szafę wysoką. Górna szafka nie posiada półek i gumowych pierścieni, proszę pominąć te dwa elementy.

Szafka PUDEŁKO 4

Lewy panel boczny 1 szt.

Panel tylny 2 szt.

Prawy panel boczny 1 szt.

Drzwi lewe 1 szt.

Drzwi prawe 1 szt.

PL

Panel górny 1 szt.

Proszę zamontować szafkę dolną zgodnie z instrukcją montażu szafy wysokiej.

W kroku 2 i 3 panel boczny i panel tylny są połączone śrubami i nakrętkami.

Panel dolny 1 szt.

Nakrętka M5
Ilość: 9 szt.

Śruba M5*10
Ilość: 9 szt.

Krok 10 półka może być dowolnie regulowana.

Półka 1 szt.

Otwory montażowe

Górne otwory montażowe blatu

Montaż do ściany

KROK 1

Kołek rozporowy
do ściany,
Ilość: 16 szt.

PL

Zaplanuj umieszczenie szafki narzędziowej, ustal położenie otworu łączącego tablicę narzędziową z szafką górną, następnie zamocuj kołek rozporowy. Nóżki szafki wysokiej i szafki dolnej mogą być podniesione, a położenie kołka rozporowego może być nieco wyższe.

KROK 2

Śruba M8*18
Ilość: 8 szt.

Nakrętka kołnierzowa M8
Ilość: 4 szt.

Umieść szafę wysoką oraz górną w odpowiednich miejscach, wyrównaj oraz połącz parami. Nitonakrętki zostały zainstalowane na bocznych panelach szafki szufladowej, nie ma potrzeby stosowania nakrętek przy łączeniu szafek.

KROK 3

Śruba samogwin-
tująca
M5*15
Ilość: 8 szt.

Zamontować blat stołu. Wkręcić śruby samogwintujące w blat przez otwory montażowe w górnej części, upewniając się, że blat jest wyrównany z zewnętrzną częścią szafek.

W razie potrzeby wyjąć kolejne szuflady, a na koniec zamontować je z powrotem na miejscu.

KROK 4

Śruba do drewna
M6*60 Ilość: 8 szt.

Podkładka metalowa Ø22,8
Ilość: 8 szt.

Zamontować tablicę narzędziową. Duże śruby samogwintujące muszą przejść przez okrągłe otwory znajdujące w czterech rogach tablicy narzędziowej oraz wkręcić się w kątki rozporowe w ścianie.

KROK 5

Śruba do drewna
M6*60 Ilość: 8 szt.

Podkładka metalowa Ø22,8
Ilość: 8 szt.

Aby zamontować szafkę, wkręć duże wkręty samogwintujące przez otwór znajdujący w tylnej ścianie szafki do kołków rozporowych.

KROK 6

Śruba M8*18
Ilość: 8 szt.

Nakrętka kołnierзова
M8

Ilość: 8 szt.

Szafkę wysoką oraz szafki górne należy skręcić przy pomocy śrub i nakrętek.

1. SAMM

Asetage kaks tagapaneeli tasasel ja ühendage need omavahel M5*10 kruvide ja mutritega. Pange tähele, et ülemine ja alumine otsaauk on samas asendis.

2. SAMM

Asetage vasakpoolne paneel, nagu pildil näidatud, ja ühendage see tagapaneeliga, kasutades M5*10 kruvisid. Pöörake tähelepanu ülemise ja alumise otsa augu asukohta.

3. SAMM

Paigaldage parempoolne külgs paneel vastavalt teisele sammule. Pöörake tähelepanu ülemise ja alumise otsaaukude asukohale, kaks külgsplaati on sümmeetrilised.

4. SAMM

Ülemiste ja alumiste paneelide paigaldamiseks tuleb külgs paneelid asetada ülemiste ja alumiste paneelide siseküljel olevate kolmnurksete joonte ja külgede vahele. Külgsplaadi nelja ümmarguse augu üks ots on ülemine ots.

5. SAMM

Kinnitage ülemine ja alumine paneel külgmiste tagapaneelide külge.

6. SAMM

Paigaldage uksehinge seib ülemise ja alumise plaadi nelja nurka.

7. SAMM

Vasakupoolse ukse paigaldamiseks joon-
dage vasaku ukse allosas olev uksehing
ava alumise plaadi vasakpoolses osas
oleva uksehinge seibi keskpunktiga,
sisestage uksehing ja seejärel kinnitage
uksehing uksehinge seibiga. Paigaldage
uksehing ja parempoolne uks samamoo-
di.

8. SAMM

Kruvige keermestatud reguleeritav nivelleerija
terasest terasjala põhja ja kinnitage teras-
jalg 4 M6*16 kruviga alumise paneeli põhja
külge, nii et väliskülg oleks alumise paneeliga
joondatud.
Paigaldage ülejäänud kolm jalga samamoodi.

9. SAMM

Paigaldage uksestopper

Paigaldage kummirõngas

Kumm on paigaldatud alumise paneeli tagaküljele.

Uksestopperisang KOGUS: 1 TK Kummirõngas KOGUS: 1 PCS

KOGUS: 1 TK

10. SAMM

Tõstke kapi püsti, paigaldage üks riiuliplaatidest kapi keskele (ukse lukustamiseks) ja ülejäänud kaks riiulit paigaldage sinna, kus on mugav.

Ülemised kapid BOX2 & 3

10. sammu juures saab riulit soovi korral reguleerida.

Riul 1 TK

Ühendusavad

Paigaldamine seinale

1. SAMM

Seinapistik,
KOGUS:16 TK

Planeerige tööriistakapi paigutus, määrake tööriistalaua ja ülemise kapi vahelise ühendusava asukoht, seejärel kinnitage seinapistik. Kõrge kapi ja aluskapi jalgu saab tõsta ja seinapistiku asukoht võib olla veidi kõrgemal.

ET

2. SAMM

Kruvi M8*18
KOGUS:8 TK

Äärikmutter M8
KOGUS:4 TK

Asetage kõrged ja ülemised kapid oma kohale, joondage need ja ühendage need paari kaupa. Sahtlitega kapi külgpaneelidesse on paigaldatud neetmutrid, mille kasutamine pole teiste kappide ühendamisel vajalik.

3. SAMM

Isekeermestav kruvi
M5*15
KOGUS:8 TK

Paigaldage töölaud. Keerake isekeermestavad kruvid töölauda sisse läbi kapi ülaosas olevate kinnitusaukude, veendudes, et töölaud on aluskapi välisküljega joondatud. Vajaduse korral eemaldage veel sahtlid ja paigaldage need lõpuks oma kohale tagasi.

4. SAMM

Puidukruvi M6*60
KOGUS:8 TK

Metallseib Ø22,8 KOGUS:8
TK

Paigaldage tööriistalaud. Tööriistalaua neljas nurgas asuvatest ümmargustest aukudest peab saama asetada läbi isekeermestavad kruvid ja need peab saama kruvida seinal asuvasse seinapistikusse, et tööriistalaud seinalle kinnitada.

5. SAMM

Puidukruvi M6*60
KOGUS:8 TK

Metallseib Ø22,8 KOGUS:8
TK

Kapi paigaldamiseks keerake suur isekeermestav kruvi läbi seinakapi tagapaneelil oleva augu seinapistikusse, et kapi kinnitada.

6. SAMM

Kruvi M8*18
KOGUS:8 TK

Äärikmutter M8
KOGUS:8 TK

Ülemiste kappide ja kõrge kapi vahel kasutatakse polte ja mutreid.

mientas con agujeros para ganchos
66 x 68,4 x 2 cm (an. x pr. x al.)

Mesa de trabajo de madera maciza
132 x 45,7 x 2,5 cm. (an. x pr. x al.)

Módulo con 4 cajones
66 x 45,7 x 86,4 cm. (an. x pr. x al.)

Armario con 2 puertas y estante.
66 x 45,7 x 86,4 cm. (an. x pr. x al.)

INSTRUCCIONES ESPECIALES DE SEGURIDAD

El mueble de almacenamiento para ga-
raje debe instalarse en posición vertical
y fijado a una pared trasera. No se debe
dejar que se sujete libremente.

Se recomienda que dos personas se
encarguen de mover y montar el arma-
rio. De lo contrario, pueden producirse
lesiones en la espalda o de otro tipo.

COMPONENTES DEL MUEBLE DE ALMACENAMIENTO PARA GARAJE

1. Armario con 2 puertas y 3 estantes
2. 2 armarios superiores
3. 2 chapas verticales para colgar herramientas
4. Mesa de trabajo
5. Módulo con 4 cajones
6. Armario con 2 puertas y estante

Montaje

Armario alto CAJA1

Panel lateral izquierdo 1 ud.

Panel trasero 2 uds.

Panel lateral derecho 1 ud.

Puerta izquierda 1 ud.

Puerta derecha 1 ud.

ES

Panel superior 1 ud.

Panel inferior 1 ud.

Estante 3 uds.

PASO 1

Coloque los dos paneles traseros en posición horizontal y conéctelos con tornillos M5*10 y tuercas. Observe que los agujeros de los extremos superior e inferior estén en la misma posición.

PASO 2

Coloque el panel izquierdo como se muestra, y conéctelo con el panel trasero con tornillos M5*10. Preste atención a la posición de los agujeros de los extremos superior e inferior.

PASO 3

Instale el panel lateral derecho como se indica en el segundo paso. Preste atención a la posición de los agujeros del extremo superior e inferior; las dos chapas laterales son simétricas.

PASO 4

Para instalar los paneles superior e inferior, los paneles laterales deben introducirse entre las líneas triangulares de la parte interior de los paneles superior e inferior y los laterales. Un extremo de los cuatro agujeros redondos de la placa lateral es el extremo superior.

PASO 5

Atornille los paneles superior e inferior a los paneles traseros laterales.

PASO 7

Para instalar la puerta izquierda, alinee el orificio de la bisagra de puerta en la parte inferior de la puerta izquierda con el centro de la arandela de bisagra de puerta en el lado izquierdo de la chapa inferior; introduzca la bisagra de puerta y luego fije la bisagra de puerta a la arandela de bisagra. Instale la bisagra de puerta y la puerta derecha de la misma manera.

PASO 6

Instale la arandela de bisagra de puerta en las cuatro esquinas de las placas superior e inferior.

PASO 8

Atornille el nivelador ajustable roscado en la parte inferior de la pata niveladora de acero y utilice 4 tornillos M6*16 para fijar la pata niveladora de acero a la parte inferior del panel inferior, de forma que el lado exterior quede alineado con el panel inferior. Instale las otras tres patas de la misma manera.

ES

PASO 9

Instale el tope para puerta.

Instale el anillo de goma.

La goma se instala en la parte trasera del panel inferior.

Tope para puerta
Cantidad:1 ud.

Tirador
Cantidad:1 ud.

Anillo de goma
Cantidad:1 ud.

Instale el tirador.

PASO 10

Ponga el armario en posición vertical, instale uno de los estantes en el centro del armario (para cerrar la puerta), y los otros dos estantes donde sea conveniente.

Armarios superiores CAJAS 2 y 3

Panel lateral
2 uds.

Panel trasero
2 uds.

Puerta izquierda
1 ud.

Puerta derecha
1 ud.

Panel superior
1 ud.

Panel inferior
1 ud.

Instale los armarios superiores igual que el armario alto. El armario superior no tiene estantes ni anillos de goma.

Armario CAJA 4

Panel lateral izquierdo 1 ud.

Panel trasero 2 ud.

Panel lateral derecho 1 ud.

Puerta izquierda 1 ud.

Puerta derecha 1 ud.

ES

Panel superior 1 ud.

Instale el armario base siguiendo las instrucciones de montaje del armario alto.

En los pasos 2 y 3, el panel lateral y el panel trasero se conectan con tornillos y tuercas.

Tuerca M5
Cantidad:
9 uds.

Tornillo M5*10
Cantidad:
9 uds.

Panel inferior 1 ud.

En el paso 10 el estante se puede ajustar según se desee.

Estante 1 uds.

Orificios de conexión

Montaje en la pared

PASO 1

Taco,
Cantidad:16 uds.

Planifique la colocación del armario de herramientas, determine la posición del orificio de conexión entre la chapa vertical para colgar herramientas y el armario superior; a continuación, instale el taco.

Las patas del armario alto y del armario base se pueden elevar, y la posición del taco puede ser un poco más alta.

ES

PASO 2

Tornillo M8*18
Cantidad:8 uds.

Tuerca con reborde M8
Cantidad: 4 uds.

Coloque el armario alto y los armarios superiores en sus respectivas posiciones, alinéelos y conéctelos por parejas. Se han instalado tuercas remachables en los paneles laterales del módulo con cajones, y no se necesitan tuercas para la conexión en el centro.

PASO 3

Tornillo autorroscante
M5*15
Cantidad:8 uds.

Instale la mesa de trabajo. Atornille los tornillos autorroscantes en la mesa de trabajo a través de los orificios de montaje de la parte superior del armario, asegurándose de que la mesa de trabajo esté alineada con el exterior del armario base.

Retire más cajones si es necesario, y por último instale los cajones en su sitio.

PASO 4

Tornillo para madera
M6*60
Cantidad:8 uds.

Arandela metálica Ø22,8
Cantidad:8 uds.

Instale la chapa vertical para colgar herramientas. Los tornillos autorroscantes grandes deben atravesar los agujeros redondos de las cuatro esquinas de la chapa vertical para colgar herramientas y atornillarse a la pared con el taco para instalar la chapa vertical para colgar herramientas en la pared.

PASO 5

Tornillo para madera
M6*60
Cantidad:8 uds.

Arandela metálica Ø22,8
Cantidad:8 uds.

Para instalar el armario en la pared, atornille el tornillo autorroscante grande a través del orificio del panel trasero del armario en el taco.

PASO 6

Tornillo M8*18
Cantidad:8 uds.

Tuerca con reborde M8
Cantidad: 8 uds.

Se utilizan pernos y tuercas entre los armarios superiores y el armario alto.

Armadiatura per garage

INTRODUZIONE

Per ottenere le massime prestazioni dal vostro nuovo prodotto, leggere le istruzioni prima dell'uso. Conservare questo manuale per un eventuale riferimento futuro.

DATI TECNICI

Armadio a 2 ante con 3 ripiani.
66 x 45,7 x 198,1 cm. (LxPxA)

2 pensili superiori a 2 ante;
66 x 30,5 x 40,6 cm. (LxPxA)

2 pannelli per attrezzi con fori per ganci ①
66 x 68,4 x 2 cm. (LxPxA)

Piano di lavoro in legno massiccio
132 x 45,7 x 2,5 cm. (LxPxA)

Modulo con 4 cassetti
66 x 45,7 x 86,4 cm. (LxPxA)

Armadietto a 2 ante con ripiano.
66 x 45,7 x 86,4 cm. (LxPxA)

ISTRUZIONI SPECIALI DI SICUREZZA

L'armadiatura per garage deve essere installata in posizione verticale, assicurata a una parete posteriore. Si raccomanda di non lasciarla solo appoggiata.

Per spostare, assemblare e montare l'armadio, è consigliabile la collaborazione di due persone. La mancata osservanza di questa precauzione può causare lesioni alla schiena o di altro tipo.

PARTI DELL'ARMADIATURA PER GARAGE

1. Armadio a 2 ante con 3 ripiani
2. 2 pensili
3. 2 pannelli per utensili
4. Banco da lavoro
5. Modulo con 4 cassetti
6. Armadietto a 2 ante con un ripiano

MONTAGGIO

Armadio alto SCATOLA 1

Pannello laterale sinistro
1 pz

Pannello posteriore
2 pezzi

Pannello laterale destro 1 pz

Anta sinistra
1 pz

Anta destra
1 pz

IT

Pannello superiore 1 pz

Pannello inferiore 1 pz

Scaffale 3 pezzi

PASSO 1

Posare in piano i due pannelli posteriori e collegarli con viti e dadi M5*10. Si noti che i fori di estremità superiore e inferiore sono nella stessa posizione.

PASSO 2

Posizionare il pannello sinistro come illustrato e collegarlo al pannello posteriore con viti M5*10. Prestare attenzione alla posizione dei fori dell'estremità superiore e inferiore.

PASSO 3

Installare il pannello laterale destro come indicato nel secondo passo. Prestare attenzione alla posizione dei fori dell'estremità superiore e inferiore: i due fianchi sono simmetrici.

PASSO 4

Per installare il pannello superiore e quello inferiore, i pannelli laterali devono essere inseriti tra le linee triangolari sul lato interno del pannello superiore e inferiore e i lati. Un'estremità dei quattro fori rotondi del fianco corrisponde all'estremità superiore.

PASSO 5

Avvitare i pannelli superiore e inferiore ai pannelli posteriori laterali.

PASSO 7

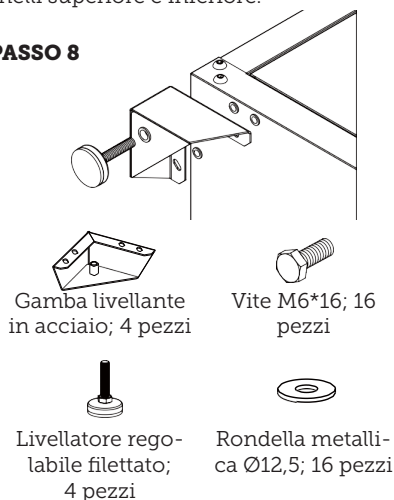

Per installare l'anta sinistra, allineare il foro della cerniera dell'anta, posto nella parte bassa dell'anta sinistra, con il centro della rondella della cerniera sul lato sinistro del pannello inferiore; inserire la cerniera dell'anta e fissarla contro la rondella della cerniera dell'anta. Installare la cerniera e l'anta destra procedendo nello stesso modo.

PASSO 6

Installare la rondella per la cerniera della porta sui quattro angoli dei pannelli superiore e inferiore.

PASSO 8

Avvitare il livellatore regolabile filettato nella parte inferiore della gamba di livellamento in acciaio e utilizzare 4 viti M6*16 per fissare la gamba di livellamento in acciaio alla parte inferiore del pannello inferiore, in modo che il lato esterno sia allineato con il pannello inferiore. Installare gli altri tre piedini nello stesso modo.

PASSO 9

Installare il
fermaporta

Installare l'anello
di gomma

L'anello di gomma è installato sul retro
del pannello inferiore.

Fermaporta; 1 pz Maniglia; 1 pz Anello di gomma;
1 pz

PASSO 10

Disporre l'armadio in posizione verti-
cale; installare uno dei ripiani al centro
dell'armadio (per bloccare l'anta) e gli
altri due ripiani dove è più comodo.

Pensili SCATOLE 2 e 3

Pannello laterale
2 pezzi

Pannello poste-
riore 2 pezzi

Anta sinistra
1 pz

Anta destra 1 pz

Pannello supe-
riore 1 pz

Pannello inferiore
1 pz

Per installare i pensili procedere come per l'armadio alto. Il pensile è privo di ripiani
e di anelli di gomma; si prega di ignorare questi due elementi.

Armadietto SCATOLA 4

Pannello laterale sinistro 1 pz

Pannello posteriore 2 pz

Pannello laterale destro 1 pz

Anta sinistra
1 pz

Anta destra
1 pz

Pannello superiore 1 pz

Pannello inferiore 1 pz

Scaffale 1 pezzi

Installare l'armadietto basso seguendo le istruzioni di montaggio dell'armadio alto.

Nei passi 2 e 3 il pannello laterale e il pannello posteriore vengono collegati mediante bulloni e dadi.

Dado M5;
9 pezzi

Vite M5*10;
9 pezzi

Passo 10: il ripiano può essere regolato a piacere.

Fori di giunzione

Vista laterale del pensile

Vista posteriore del pensile

Vista destra dell'armadio alto

Vista laterale dell'armadietto basso

Vista posteriore dell'armadietto basso

Fori di giunzione al piano di lavoro

Vista dall'alto dell'armadio

Pannello portautensili

Foro di giunzione alla parete

Montaggio a parete

PASSO 1

Tassello; 16 pezzi

Pianificare la collocazione dell'armadiatura portautensili; determinare la posizione del foro di giunzione tra il pannello portautensili e il pensile, quindi fissare il tassello alla parete.

I piedini dell'armadio e dell'armadio basso possono essere alzati e la posizione del tassello può essere leggermente più alta.

IT

PASSO 2

Vite M8*18; 8 pezzi Dado flangiato M8; 4 pezzi

Disporre l'armadio alto e i pensili nelle rispettive posizioni, allinearli e unirli a coppie. I dadi di serraggio sono stati montati sui pannelli laterali del modulo con i cassetti; non servono dadi per collegare altri armadi.

PASSO 3

Vite autofilettante
M5*15; 8 pezzi

Installare il piano di lavoro. Inserire avvitando le vite autofilettanti nel piano di lavoro attraverso i fori di montaggio presenti sulla parte superiore dell'armadietto, assicurandosi che il piano di lavoro sia allineato con l'esterno dell'armadietto basso. Se necessario, rimuovere altri cassetti e rimontare i cassetti alla fine.

PASSO 4

Vite per legno M6*60; 8 pezzi

Rondella metallica Ø22,8; 8 pezzi

Installare il pannello portautensili. Inserire le viti autofilettanti di grandi dimensioni nei fori rotondi situati ai quattro angoli del pannello portautensili e avvitare nel tassello sul muro, per fissare il pannello portautensili contro il muro.

PASSO 5

Vite per legno M6*60; 8 pezzi

Rondella metallica Ø22,8; 8 pezzi

Per installare il pensile, avvitare la vite autofilettante grande nel foro presente nel pannello posteriore del pensile nel tassello a muro, in modo da fissare il pensile.

PASSO 6

Vite M8*18; 8 pezzi

Dado flangiato M8; 8 pezzi

Tra i pensili e l'armadio alto si utilizzano bulloni e dadi.

Garagekast

INLEIDING

Om het beste uit uw nieuwe product te halen, gelieve deze instructies voor gebruik door te lezen. Bewaar de handleiding voor het geval u deze op een later moment wilt raadplegen.

TECHNISCHE GEGEVENS

Kast met 2 deuren en 3 legplanken.
66 x 45,7 x 198,1 cm. (BxDxH)

2 bovenkasten met elk 2 deuren.
66 x 30,5 x 40,6 cm. (BxDxH)

2 gereedschapspanelen met gaten voor haken
66 x 68,4 x 2 cm. (BxDxH)

Werkblad van massief hout
132 x 45,7 x 2,5 cm. (BxDxH)

Ladeblok met 4 lades
66 x 45,7 x 86,4 cm. (BxDxH)

Kast met 2 deuren en legplank.
66 x 45,7 x 86,4 cm. (BxDxH)

SPECIALE VEILIGHEIDSINSTRUCTIES

De garagekast moet rechtop staan en aan een achterwand worden bevestigd. Nooit de kast vrijstaand neerzetten!

Het is raadzaam dat twee personen de kast monteren, verplaatsen en bevestigen. Anders kan rug- of ander letsel het gevolg zijn.

ONDERDELEN VAN DE GARAGEKAST

1. Kast met 2 deuren en 3 legplanken
2. 2 bovenkasten
3. 2 gereedschapspanelen
4. Werkblad

Montage

Hoge opbergkast DOOS 1

Linkerzijpaneel
1 stuk

Achterpaneel
2 stuks

Rechterzijpaneel
1 stuk

Linkerdeur
1 stuk

Rechterdeur
1 stuk

Bovenpaneel 1 stuk

Onderpaneel 1 stuk

Legplank
3 stuks

NL

STAP 1

Leg de twee achterpanelen plat en verbind ze met schroeven en moeren M5x10. Let erop dat de eindgaten boven en onder zich in dezelfde positie bevinden.

STAP 2

Plaats het linkzijdigpaneel zoals afgebeeld, en verbind het met schroeven M5x10 met het achterpaneel. Let op de positie van de eindgaten boven en onder.

STAP 3

Installeer het rechterzijpaneel volgens de tweede stap. Let op de positie van de bovenste en onderste eindgaten. De twee zijplaten zijn symmetrisch.

STAP 4

Om de boven- en onderpanelen te monteren, moet u de zijpanelen tussen de driehoeken aan de binnenzijde van de boven- en onderpanelen en de zijkanten schuiven. Het uiteinde van de zijplaat met de vier ronde gaten is het bovenste uiteinde.

STAP 5

Schroef M8x10
aantal: 16
stukks

Flensmoer
M8 aantal: 16
stukks

Inbus-
steutel

Schroef de boven- en onderpanelen
aan de achterpanelen.

STAP 6

Deurschar-
nerring
aantal: 4 stuks

Plaats de scharnerring op de vier hoe-
ken van het boven- en onderpaneel.

STAP 7

Deurschar-
nier aantal:
4 stuks

Om de linkerdeur te installeren, moet u
het deurscharniergeat onderaan de lin-
kerdeur uitlijnen met het midden van de
deurscharnerring aan de linkerkant van
het onderpaneel. Plaats het deurscharnier
en druk het deurscharnier vervolgens
vast aan de deurscharnerring. Installeer
het deurscharnier en de rechterdeur op
dezelfde manier.

STAP 8

Stalen poot aan-
tal: 4 stuks

Schroef M6x16
aantal: 16 stuks

Stelpoot met
schroefdraad
aantal: 4 stuks

Metalen ring
Ø12,5 aantal: 16
stuks

Schroef de stelpoot met schroefdraad in de on-
derkant van de stalen poot. Gebruik 4 schroe-
ven M6x16 om de stalen poot aan de onderkant
van het bodempaneel te bevestigen om de
buitenkant uit te lijnen met het onderpaneel.
Monteer de andere drie poten op dezelfde
manier.

STAP 9

Monteer de deurstopper

Monteer de rubberen ring

Het rubber moet aan de achterkant van het bodempaneel worden gemonteerd.

Monteer de handgreep

Deurstopper
aantal: 1 stuk

Handgreep
aantal: 1 stuk

Rubberen ring
aantal: 1 stuk

STAP 10

Zet de kast rechtop en leg een van de legplanken in het midden van de kast (om de deur te vergrendelen). De twee andere legplanken kunt u naar believen plaatsen.

Bovenkasten DOOS 2 & 3

Zijpaneel 2 stuks

Achterpaneel
2 stuks

Linkerdeur
1 stuk

Rechterdeur
1 stuk

Bovenpaneel
1 stuk

Onderpaneel
1 stuk

Monteer de bovenkasten op dezelfde manier als de hoge kast. De bovenkast heeft geen planken en rubberen ringen. Negeer daarom deze twee items.

Kast DOOS 4

Linkerzijpaneel
1 stuk

Achterpaneel
2 stuk

Rechterzijpaneel
1 stuk

Linkerdeur
1 stuk

Rechterdeur
1 stuk

Bovenpaneel 1 stuk

Onderpaneel 1 stuk

Legplank
1 stuk

Monteer de lage kast volgens de montage-instructies van de hoge kast.

NL

In stap 2 en stap 3 moet u het zijpaneel en het achterpaneel met bouten en moeren verbinden.

Moer M5
aantal: 9 stuks

Schroef M5x10
aantal: 9 stuks

Stap 10: Plaats de plank waar u maar wil.

Verbindingsgaten

Rechteraanzicht van de hoge kast

Zijaanzicht van de lage kast

Achteraanzicht van de lage kast

Verbindingsgaten werkblad

Aan de muur bevestigen

STAP 1

Muurplug
aantal: 16 stuks

Bepaal de plaats van de gereedschapskast. Bepaal daarna de positie van het verbindingsgat tussen het gereedschapspaneel en de bovenkast. Bevestig vervolgens de muurplug.

De poten van de hoge kast en de onderkast kunnen worden verhoogd, en u kunt de muurplug iets hoger positioneren.

STAP 2

Schroef M8x18
aantal: 8 stuks

Flensmoer M8
aantal: 4 stuks

Plaats de hoge en de bovenkasten op hun respectieve plaatsen, lijn ze uit en verbind ze paarsgewijs. De klinkmoeren zijn op de zijpanelen van de ladekast aangebracht. U hoeft de moeren niet te gebruiken om de andere kasten te verbinden.

STAP 3

Zelf-tappende
schroef
M5x15
aantal: 8 stuks

Monteer het werkblad. Schroef de zelftappende schroeven in het werkblad door de montagegaten aan de bovenkant van de kast. Zorg ervoor dat het werkblad uitgelijnd is met de buitenkant van de lage kast.

Verwijder zo nodig meer lades en plaats de lades tenslotte terug op hun plaats.

STAP 4

Houtschroef M6x60
aantal: 8 stuks

Metalen ring $\varnothing 22.8$
aantal: 8 stuks

Installeer het gereedschapspaneel. Steek de grote zelftappende schroeven door de ronde gaten op de vier hoeken van het gereedschapspaneel. Schroef ze in de muurpluggen om het gereedschapspaneel aan de muur te bevestigen.

STAP 5

Houtschroef M6x60
aantal: 8 stuks

Metalen ring $\varnothing 22.8$
aantal: 8 stuks

Om de kast aan de muur te bevestigen, moet u de grote zelftappende schroef door het gat op het achterpaneel van de wandkast in de muurplug schroeven.

STAP 6

Schroef M8x18
aantal: 8 stuks

Flensmoer M8
aantal: 8 stuks

Gebruik bouten en moeren tussen de bovenkasten en de hoge kast.

Montage

Armoire de rangement haute BOÎTE1

Panneau latéral gauche 1 pc.

Panneau arrière 2 pcs.

Panneau latéral droit 1 pc.

Porte gauche 1 pc.

Porte droite 1 pc.

Panneau supérieur 1 pc.

Panneau inférieur 1 pc.

Étagère 3 pcs.

ÉTAPE 1 :

Posez les deux panneaux arrière à plat et raccordez-les avec des vis et des écrous M5*10. Notez que les trous des extrémités supérieure et inférieure sont dans la même position.

ÉTAPE 2 :

Placez le panneau gauche comme indiqué, et reliez-le au panneau arrière avec des vis M5*10. Faites attention à la position des trous d'extrémité supérieurs et inférieurs.

ÉTAPE 3 :

Installez le panneau latéral droit en suivant la deuxième étape. Faites attention à la position des trous d'extrémité supérieurs et inférieurs, car les deux panneaux latéraux sont symétriques.

ÉTAPE 4 :

Pour installer les panneaux supérieur et inférieur, les panneaux latéraux doivent être insérés entre les lignes triangulaires situées sur la face intérieure des panneaux supérieur et inférieur et les côtés. L'une des extrémités des quatre trous ronds de la plaque latérale est l'extrémité supérieure.

ÉTAPE 5 :

Boulonnez les panneaux supérieur et inférieur aux panneaux arrière latéraux.

ÉTAPE 7 :

Pour installer la porte gauche, alignez le trou de la charnière de porte sur le bas de la porte gauche en plaçant le centre de la rondelle de charnière de porte sur le côté gauche de la plaque inférieure, insérez la charnière de porte, puis fixez la charnière de porte à la rondelle. Installez la charnière de la porte et la porte droite de la même manière.

ÉTAPE 6 :

Installez les rondelles de charnière de porte aux quatre coins des plaques supérieure et inférieure.

ÉTAPE 8 :

Vissez le niveleur réglable fileté dans le bas du pied de nivellement en acier, et utilisez 4 vis M6*16 pour fixer le pied de nivellement en acier au bas du panneau inférieur, de sorte que le côté extérieur soit aligné avec le panneau inférieur. Installez les trois autres pieds de la même manière.

ÉTAPE 9 :

Installer le butoir de porte

Installer l'anneau en caoutchouc

Le caoutchouc est installé à l'arrière du panneau inférieur.

Butée de porte
QTÉ : 1 pc.

Poignée
QTÉ : 1 pc.

Anneau en caoutchouc
QTÉ : 1 pc.

Installer la poignée

ÉTAPE 10 :

Redressez l'armoire, installez l'une des étagères au milieu de l'armoire (pour verrouiller la porte). Les deux autres étagères peuvent être installées à l'endroit qui vous convient.

Armoires supérieures BOÎTE 2 et 3

Panneau latéral
2 pcs.

Panneau arrière
2 pcs.

Porte gauche
1 pc.

Porte droite 1 pc.

Panneau supérieur
1 pc.

Panneau inférieur
1 pc.

Installez les armoires supérieures en suivant la même procédure que l'armoire haute. L'armoire supérieure n'a pas d'étagères ni d'anneaux en caoutchouc, veuillez ignorer ces deux éléments.

Armoire BOÎTE 4

Panneau latéral gauche 1 pc.

Panneau arrière 2 pc.

Panneau latéral droit 1 pc.

Porte gauche 1 pc.

Porte droite 1 pc.

Panneau supérieur 1 pc.

Panneau inférieur 1 pc.

Étagère 1 pcs.

Veillez installer le meuble bas en respectant les instructions de montage du meuble haut.

Aux étapes 2 et 3, le panneau latéral et le panneau arrière sont reliés par des boulons et des écrous.

Écrou M5
QTÉ : 9 pcs.

Vis M5*10
QTÉ : 9 pcs.

Étape 10 : l'étagère peut être ajustée à volonté.

Trous de connexion du plan de travail

Vue de dessus de l'armoire

Panneau à outils

Trou de connexion de l'armoire murale

Montage au mur

ÉTAPE 1 :

Cheville murale
QTÉ : 16 pcs.

Planifiez l'emplacement de l'armoire à outils, déterminez la position du trou de connexion entre le panneau à outils et l'armoire supérieure, puis fixez la cheville murale.

Les pieds de l'armoire haute et de l'armoire basse peuvent être relevés, et la position de la cheville murale peut être un peu plus haute.

ÉTAPE 2 :

Vis M8*18
QTÉ : 8 pcs.

Écrou à bride M8
QTÉ : 4 pcs.

FR

Placez l'armoire haute et les armoires supérieures dans les positions respectives, alignez-les et connectez-les par paires. Des écrous de rivetage ont été installés sur les panneaux latéraux de l'armoire à tiroirs. Il n'est pas nécessaire d'utiliser les écrous lors du raccordement d'autres armoires.

ÉTAPE 3 :

Vis autotaraudeuse
M5*15
QTÉ : 8 pcs.

Installez le plan de travail. Vissez les vis autotaraudeuses dans le plan de travail à travers les trous de montage situés sur le dessus de l'armoire, en vous assurant que le plan de travail est aligné avec l'extérieur de l'armoire basse.

Retirez d'autres tiroirs si nécessaire, et enfin remettez les tiroirs en place.

ÉTAPE 4 :

Vis à bois M6*60
QTÉ : 8 pcs.

Rondelle métallique Ø22,8
QTÉ : 8 pcs.

Installez le panneau à outils. Les grandes vis autotaraudeuses doivent passer par les trous ronds situés aux quatre coins du panneau à outils et se visser dans la cheville murale du mur pour fixer le panneau au mur.

ÉTAPE 5 :

Vis à bois M6*60
QTÉ : 8 pcs.

Rondelle métallique Ø22,8
QTÉ : 8 pcs.

Pour installer l'armoire, vissez la grande vis autotaraudeuse au travers du trou du panneau arrière de l'armoire murale dans la cheville murale pour fixer l'armoire.

ÉTAPE 6 :

Vis M8*18
QTÉ : 8 pcs.

Écrou à bride M8
QTÉ : 8 pcs.

Des boulons et des écrous sont utilisés entre les armoires supérieures et l'armoire haute.
